Safety
- Timer: Double safe + auto shut-off
- Insulation: Kema Class II (double insulated)
- Safety norm: UV type III European CENELEC
- Filter: Hardened glass
- Slider: Double blocking security
- Number of safety goggles: 2

Logistic data scent granules
- 12NC code: 884308001010
- CTV code: 884 3 080 01000
- EAN A-box: 8710103191339
- EAN F-box: 8710103191322

Highlights

Adjustable infrared temperature
The infrared temperature can be adjusted by dimming the infrared lamps. This means that during your relaxation session you can enjoy the warmth level that's most comfortable for you.

Infrared comfort zones
The infrared comfort zones provide extra warmth for the parts of your body that require a bit of extra attention, such as cold feet, or an aching back or neck. Simply select one of the zones ('feet & legs', 'legs & torso' or 'torso & head') and an additional boost of 200 Watt of infrared warmth will be released to pamper your body where you need it most.

Infrared waves
Infrared waves fully relax your body and mind. The four infrared lamps switch to extra power sequentially, giving you the experience of the warm sun moving over your body: an ultra-relaxing warmth experience.

Infrared revitalisation
Innergize infrared improves your blood circulation, warms you up and makes you feel renewed and revitalised. When your muscles and joints are stiff or tired, you can relax and pamper them by using the Innergize's infrared lamps separately to enjoy pleasant warmth for deep full-body relaxation.

Active audio with digital radio
Two integrated speakers let you enjoy relaxing, pre-programmed sounds of nature. Alternatively, you can listen to your favourite station on the built in digital radio or connect your own CD or MP3 player to listen to your music.

Natural scents
Innergize offers a choice of three unique ambient scents that enhance the multi-sensory experience (Summer Blue, Orange Valley and Green Oasis, accessory no. HB080). Just choose your favourite and adjust the intensity to your preference.

InfraTan
During the tanning experience, infrared lamps are used simultaneously with tanning lamps. Not only does this create more comfortable warmth, but the infrared lamps also enhance tanning by improving the blood circulation in the skin. The Innergize is designed to let you enjoy on average (depending on skin type) 30 minutes of safe, relaxing full body tanning.

XXL full-body field (210 x 70 cm)
The XXL full-body tanning and relaxation field (210 x 70 cm) is ideal for taller people. The parabolic reflector with hammer finish ensures the UV and infrared light evenly covers your entire body.

4 step set-up
Unfolds from compact, storable size in three simple steps.

Foldable
The ingenious design of the full-body solarium lets you fold the appliance to the size of a compact suitcase, for convenient and space saving storage.
